

Week 2: Day 7 – Exercises

1. Try & Except FileIO: copy **try_except_fileIO.py** from the github repo, and follow the instructions to write a segment of code that handles incorrect input into your rainfall reading function that you wrote last week
2. Try & Except Input Number: copy **try_except_user_input_is_number.py** from the github, and now write a while loop that only accepts integer numbers
3. Finish the biopython_mystery notebook
4. Write some anonymous functions with the keyword lambda and try them out
 - a. for example, to add, subtract, or multiply numbers
